

Saw Mark Straight Line Distressing Machine

Distressing wood surfaces is a growing trend. Re-sawn distressing, a look reminiscent of wood flooring from past centuries, is a specialty feature and is in hot demand.

To replicate saw blade distressing, consider an automated approach by using a specialized machine - the Boss Saw Mark Machine.

This device is suitable for antique floors, furniture board, and other sheet surface treatment.

The wood surface treatment will appear irregular at varying thickness, depth and spacing giving an authentically handmade look and feel.

The equipment can work widths from 5mm to 220mm and from 5mm to 30mm in working thickness. It can scrape in a random pattern creating straight saw mark lines with adjustable depth of cut.

FEATURES:

- Heavy-duty construction
- Variable speed adjustment
- Equipped with carbide cutter tool
- PLC touch screen control
- Emergency stop and overload protection

SPECIFICATIONS:

- Voltage: 380//415V/440V, 50/60HZ
- Main Motor: 10HP
- Wood Thickness: 8mm-80mm
- Width: 10mm-220mm
- Speed: 0m - 10m./min

CAPACITY:

1000 m2
