

Two Unit Boring Machine HS25-T2

Features

- The machine combines horizontal and vertical boring function in one unit. It can be set for vertical boring operation to meet various sizes of boring.
 - The horizontal boring unit can be tilted manually for angular drilling.
 - The vertical boring unit can be adjusted in forward/backward, upward/downward direction.
 - Entire boring cycle can be fast and conveniently accomplished by pressing on the foot switch.
 - Two fences provide convenient positioning of the workpiece.
 - Quickly chucks provide confident fitting and dismantling for boring bits.
- Standardly attached with 1/3 pcs

Convenient change of drill bit

Specially designed with a dovetailed sleeve between the drill bit and the transmission rod. It provides fast drill bit change by simply press it and draw upward for fast installing or dismentling the drill bit without assistance of any tool. You get time saving and efficient operation.

Specifications

Distance between centers	32 mm
Number of spindles per boring head	25 + 25
Max. drilling depth	70 mm
Boring head adjustment	0° - 90°
Table size	1070 x 490 mm
Spindle speed	2800 rpm
Motor	2,5 HP x 2
N.W. / G.W.	550 / 650 kg
Machine size	1220 x 820 x 1370 mm
Packing size	1422 x 889 x 1702 mm
